CNF Host First Annual CNF Cyber Camp

SAN ANTONIO 07 June 2016—CNF Technologies has partnered with Northside Independent School District (NISD) to host the first annual CNF Cyber Camp for aspiring cybersecurity professionals. Several high school students attended camp at the CNF Corporate headquarters for four weeks where they conducted hands-on exercises, participated in class instruction and discussions, and met with industry professionals. The cyber camp participants learned and discussed national security cybersecurity issues, ethics, and foundation topics. Their hands-on experience included the use of security testing tools, software application development, and vulnerability scanning, identification, and management. As an added bonus, the students attended a personalized tour of the top cybersecurity program in the U.S., at the University of Texas at San Antonio (UTSA). While at UTSA the students received an overview of the Computer Science (CS) program from three top-tier professors to include the chair for the CS program. The camp participants were then taken on a tour through the state-of-the-art labs and facilities of UTSA. The CNF Cyber Camp concluded with the participants presenting and demonstrating their software applications to CNF's Chief Executive Officer (CEO).

About CNF Technologies

CNF Technologies (CNF) was incorporated in 2005 as a small disadvantaged business. Since inception, CNF has been providing the San Antonio cyber workforce with distinguished careers, professional development, and continuing education benefits. Fred Ramirez, Founder of CNF is dedicated to customer mission success, employee fulfillment, and giving back to the San Antonio community. CNF has a dedicated community outreach program with an established scholarship and internship program at a local university, a partnership and cyber camp with a local high school, and an annual donation drive to give to underprivileged children.

"At CNF, I believe our employees are our greatest strength and I take a personal interest and focus on ensuring their personal and professional growth and advancement. Without their expert knowledge, dedication and passion in everything they do, we would not be able to support our client's mission."

– Fred Ramirez, Founder

The founders of CNF were pioneers in the cyber operations domain who were instrumental in the stand-up of the Air Force Computer Emergency Response Team (AFCERT) and the first Veterans Affairs Computer Incident Response Center (CIRC) and have more than century of combined experience in the Air Force, NSA and industry. CNF specializes in solving the most challenging problems in cyber security today, working in offensive and defensive technology development, malicious code analysis and exploitation, Defensive Cyber Operations (DCO) and support to Cyber Protection Teams that includes intrusion analysis/prevention, incident response, vulnerability management and eradication, cyber forensics, and training.
