

CNF Technologies Corporation Selected For "San Antonio's Fast Track Companies"

July 15, 2011

CNF Technologies Corporation of San Antonio, TX has been honored with recognition by San Antonio Business Journal in its selection of "San Antonio's Fast Track Companies" for 2011.

Announcing a special recognition appearing in the July, 2011 issue of San Antonio Business Journal published by American City Business Journals. CNF Technologies Corp was selected for the following honor: "San Antonio's Fast Track Companies". CNF was founded in 2005 and has steadily increased its revenue year after year. CNF has experienced a 71% percent average compound revenue growth from 2008 through 2010. The company was ranked 3rd in the city based on its growth rate during this period. The honor is even more significant because of the less-than-robust economy the past few years. CNF was among 29 companies that were recognized at an awards banquet hosted by the sponsors of Fast Track.

A spokesperson from CNF Technologies Corp commented on the recognition: "This is quite an honor for us. The fact that San Antonio Business Journal included CNF Technologies Corp in its selection of "San Antonio's Fast Track Companies," signals that our constant efforts towards business excellence are paying off. We are proud to be included in this recognition."

Following the publication of CNF Technologies' selection for San Antonio Business Journal's San Antonio's Fast Track Companies list, American Registry seconded the honor and added CNF Technologies to the "Registry of Business Excellence™".

About CNF Technologies

CNF Technologies is systems engineering company offering a myriad of solutions in information assurance and cyber operations enabling government agencies and commercial companies to identify, understand, and mitigate security risks; assess and assure network and information integrity; and ensure compliance with DIACAP, NIACAP, and FISMA, as well as HIPPA, GLBA, Sarbanes-Oxley, and other regulatory standards.

Since its founding in 2005, CNF has utilized their expertise to deliver unparalleled, cost effective results and unmatched customer service. CNF personnel have decades of experience in network defense, intrusion detection, and incident response, as well as designing, managing, operating, and sustaining enterprise level systems. Clients include the Department of Defense, U.S. Air Force, AF Surgeon General, AF Cryptologic Support Group, and the 24th Cyber NAF, 67th NW Wing, 688th IO Wing, and Department of Veterans Affairs.
