Air Force Selects CNF Technologies for Flagging Analysis System Software Support & Maintenance

SAN ANTONIO 18 Aug 2014 – The 502nd Contracting Squadron out at Lackland Air Force Base has competitively awarded CNF Technologies a Firmed Fix Price contract through its NETCENTS II Prime. This is a 5-year contract. CNF will provide software maintenance support to the 453rd Electronics Warfare Squadron flagging systems. The support includes automation of the flagging functions such as data analysis and quality control in support of the reprogramming of U.S. Army and Air Force Electronic Warfare systems. In addition to software maintenance, the team will provide software performance improvements, operations support, configuration management, and testing.

About CNF Technologies

CNF Technologies Corporation is a cyber-focused comprehensive systems engineering small disadvantage business, providing a full spectrum of solutions to assure customer mission success. Our principals were founding members of the Air Force Computer Emergency Response Team (AFCERT) in 1992; the National Reconnaissance Office (NRO) incident response center in 1999; and the Department of Veterans Affairs (VA) Computer Incident Response Center (CIRC) & Network Security Operations Center (NOSC) in 2002. The CNF Team is comprised of certified professionals, recognized as industry experts on the cyberspace forefront defending crucial networks and infrastructures against all adversaries.

CNF has a low overhead organizational structure which enables us to provide highly technical and experienced personnel at an extremely competitive low price range. Only twenty-five cents of every dollar goes to the company, leaving the overwhelming majority amount to benefit our employees by providing competitive salaries, above-par benefits, career development and education/training to meet new technology requirements. We have a 97% retention rate, far above industry standard, that enables CNF to acquire and maintain personnel with the proper skillsets through the duration of a contract. This give our customers a low cost highly technical service with the consistency and longevity needed to effectively and efficiently meet all mission requirements. Our competitively low price, technical expertise, qualifications and experience makes CNF the ideal best value choice. For more information, visit CNF Technologies at www.cnftech.com.
