CNF Technologies Awarded NETCENTS II NOSB

SAN ANTONIO 27 Mar 2014 – **CNF Technologies**, a premier cyber-focused comprehensive system engineering small business for the Federal, military, and corporate markets, announced today that they are on the Smartronix's winning team for the Air Force's NETCENTS II Network Operations Small Business Companion (NOSB) contract vehicle. The NETCENTS II vehicle delivers network operations service support to mission areas. The solicitation was for a multiple-award IDIQ contract with a ceiling of \$5.79B to provide solutions to support network operations, core enterprise services and infrastructure development and operations, including Network management/defense, Services Oriented Architecture infrastructure, enterprise level security/management and implementation/operations, telephony infrastructure & services. The procurement was a small business set-aside with the NAICS 517110-Wired Telecommunications Carriers.

Government agencies wishing to obtain information about CNF Technologies can go to the AF NETCENTS II website at: <http://www.netcents.af.mil/contracts/netcents-2/> or by contracting CNF at info@cnftech.com or (210) 957-2800.

About CNF Technologies

CNF Technologies Corporation is a cyber-focused comprehensive systems engineering small disadvantage business, providing a full spectrum of solutions to assure customer mission success. Our principals were founding members of the Air Force Computer Emergency Response Team (AFCERT) in 1992; the National Reconnaissance Office (NRO) incident response center in 1999; and the Department of Veterans Affairs (VA) Computer Incident Response Center (CIRC) & Network Security Operations Center (NOSC) in 2002. The CNF Team is comprised of certified professionals, recognized as industry experts on the cyberspace forefront defending crucial networks and infrastructures against all adversaries.

CNF has a low overhead organizational structure which enables us to provide highly technical and experienced personnel at an extremely competitive low price range. Only twenty-five cents of every dollar goes to the company, leaving the overwhelming majority amount to benefit our employees by providing competitive salaries, above-par benefits, career development and education/training to meet new technology requirements. We have a 97% retention rate, far above industry standard, that enables CNF to acquire and maintain personnel with the proper skillsets through the duration of a contract. This give our customers a low cost highly technical service with the consistency and longevity needed to effectively and efficiently meet all mission requirements. Our competitively low price, technical expertise, qualifications and experience makes CNF the ideal best value choice. For more information, visit CNF Technologies at www.cnftech.com.
