CNF's CEO Mentors Other Women Entrepreneurs at SABJ's Bizwomen Event

SAN ANTONIO 12 FEB. 2018 – “be INSPIRED”, the theme of the San Antonio Business Journal’s annual Bizwomen Mentoring Monday. Mrs. Roxanne Ramirez, CEO of CNF Technologies, participated in this year’s Mentoring Monday, wholeheartedly embracing and sharing this concept. She had one-on-one sessions with at least a dozen aspiring women entrepreneurs. As an avid proponent of encouraging, inspiring, and educating women to not only to pursue careers in STEM but to strive for leadership in STEM, this was an ideal venue for likeminded individuals across 43 cities to share and learn from one another. Representing CNF Technologies, Roxanne was one of 40 mentors, but the only one to represent Cyber Security and Systems Engineering for the Federal Government, a predominantly male-oriented industry.

Since assuming her role as CEO in January 2016, CNF’s growth has gone through the roof. CNF was recognized by the SABJ as one of the city’s fastest growing companies, the second largest Cybersecurity provider, and the city’s longest-standing cybersecurity company. Roxanne, herself was recognized for her accomplishments, leadership, and business acumen as one of the city’s top CEOs during the C-Suit Awards. Through her leadership, CNF has achieved the ISO 9001:2015 registration, a testament of CNF’s exemplary quality management system, procedures, and ability to consistently provide services that exceed customer and applicable statutory and regulatory requirements. Roxanne has also been very involved in the San Antonio community through scholarships, internships, cyber shadow day for high school students, CyberPatriot sponsorship, partnering with SA Works/Workforce Solutions, and providing guest speaks to universities and high schools. Roxanne has also established CNF’s Light The Night Team to support the Leukemia & Lymphoma Society, and an annual CNF food drive supporting the SA Food Bank. Great things are happening at CNF and in San Antonio, and Roxanne Ramirez is at the forefront making tremendous strides.

About CNF Technologies

CNF is a top cybersecurity provider in San Antonio Texas. Applying exceptional expertise and extensive experience, CNF is a proven provider in developing, testing, fielding, sustaining, and employing Cyber weapon systems and technologies for Offensive and Defensive Cyber Operations, Cybersecurity Risk Management, and support to Law Enforcement and Counterintelligence operations. CNF’s rapid prototyping capability produces state of art cyber defense platforms enabling efficient and all-encompassing cybersecurity for Department of Defense (DoD) enterprises, information, and infrastructure.
